**EC is the first  
Luxembourgish company  
qualified with IRIS**

This trademark is the property of its respective owner

Since 30<sup>th</sup> of August 2010 EC is certified according to IRIS Rev.02. With this certification EC is the first Luxembourgish company qualified with IRIS. EURO-COMPOSITES S.A. was successfully audited in June 2010 according to IRIS Rev. 02 qualification in the following field of application:

„Development and production of lightweight sandwich material and interior components for train applications including self supporting elements as intermediate floors for double deck trains, roofs and end walls.“

Euro-Composites S.A., Echternach and its subsidiary Euro-Composites GmbH, Bitburg were proofed by the DQS GmbH (German society for certification of management systems). EC produces in both locations a wide variety of system components for the railway industry. Due to the fact that many of our customers are co-initiators of IRIS, the participation was a matter of course.

„Customer satisfaction and retention are principles of our company philosophy“, declared Dr.-Ing. Ewaryst Rzepka, responsible Senior Manager of Quality Assurance at EC.

The „International Railway Industry Standard“ (IRIS) was initiated by the „Union des Industries Ferroviaires Européennes“ (UNIFE) in cooperation with the leading system manufacturers in the industry like Alstom, Ansaldo Breda, Bombardier, Faiveley Transport, Ghh-Valdunes, Harting Pushing Performance, Knorr-Bremse, Sécheron, Voith Engineered reliability, the railway operators London Underground, NedTrain, RATP, Russian Railways, SBB, CFF,FFS,B, SNCF, TMB-Transports Metropolitans de Barcelona, as well as by the railway associations ACRI AGORIA, ASSFER, 'Bahnindustrie.at, Danish Railway Group, Die Bahnindustrie-VDB, ERPC, FIF, Holland Rail Industrie, Railway Industrie Association, SIRTS, SWEDTRAIN SWISSRAIL UITP, VDV, ZVEI.

On the basis of these internationally accepted rules and standards the quality management systems of rail car manufacturers, their suppliers and the engineering services are proofed.

The audit is accomplished by the accredited certification centre of the IMC (IRIS Management Centre).

The synergy effects resulting from this qualification will be passed on to the customers through high quality and cost reduction. In the future EC and its ambitious clients will benefit from these advantages.

Further information on IRIS certification can be found under:
