**Qualification for bonding according to DIN 6701-02**

---

**The EURO-COMPOSITES® -  
Group receives certificate  
for the use of adhesive  
bonding**

The EURO-COMPOSITES®-Group is qualified for the use of adhesive bonding in the manufacture of railway vehicles and components according to DIN 6701-02. After a successful audit in August 2009, the Euro-Composites S.A. Echternach/ Luxembourg passed the DIN 6701-02 for the category A1

At the same time, the EURO-COMPOSITES GmbH, Bitburg received the DIN 6701-02 as a supplier company for category A3.

The audit was done by the „Technologie Centrum Kleben GmbH“, which cooperates with the GSI SLV.

The German Railway Department (EBA) has made the DIN 6701 mandatory for all manufacturers of bonded products in the railway industry. This includes also the trade with bonded products, as well as the service for adhesive bonding in technical constructions.

The special adhesive bonding activities of EC and its high-level quality standards are some of the reasons for the successful development of the company confirmed by this certificate.

Due to the growing internationalization of the railway business EC is sure that also customers from other countries will see the qualification according to DIN 6701 as a benefit for their products.

Echternach, April 2010
