**EC® achieves "Merit Status" with NADCAP**

---

**EC® confirms as top level supplier**

*This trademark is the property of its respective owner.*

Euro-Composites® achieves "Merit Status" with Nadcap the second time! This status is generally recognized as an approval of a company's quality performance and loyalty to its customers.

Furthermore it extends the interval between audits. Now, for the second time, EC® achieved the "Merit Status" with Nadcap for a period of 18 month. After three Nadcap audits with this result the third interval will be extended to 24 month as a sign of trust in the company's quality management.

Nadcap is the worldwide co-operative program of major companies, which allows industry oversight of the quality control of specific manufacturing processes and products within the aerospace sector, from coatings and composites to electronics and heat treatment. It promotes continuous improvement and enhances product quality by focusing on overall supplier performance.

Quality is fundamental to EC®, which is the one and only company in Luxembourg to achieve Nadcap approval for composite manufacturing. It also carries customer approvals from most of the major aircraft manufacturers, including Airbus, BAE Systems, Boeing, Northrop Grumman, and Bombardier. It is approved to EASA Part 21G, which allows it to manufacture and release to service components direct to the original equipment manufacturer and airlines covered by the European agency.

Euro-Composites® offers design and manufacturing for composites and a capability for prototyping, testing and finishing of complete composite components.

As a consequence, EC® can offer its worldwide customers a global facility to take responsibility for complete development and manufacture of composite projects.

Echternach, February 2011
